Please settle this case ASAP. I am very tired of disgruntled companies who are not capable of competing on their own trying to use the courts to further their position in the world of tough competition. I thought capitalism is what made us a free enterprise nation, and competition is what enables the best of the best to help build this country on a world wide basis. I still do not understand why the previous administration wanted to punish a remarkable company like Microsoft. Let's get on with life, stop wasting taxpayers money and let the best companies win. That's what it is all about.
